

## SAFE SNACK GUIDE 2016-2017

In an attempt to keep all students safe and healthy the district encourages parents, teachers and other staff members to follow the Safe Snack Guidelines when planning celebrations, class projects, after school activities and field trips. All snacks/treats must be in their original packaging and/or individually wrapped so staff can identify the food label. We cannot guarantee 100% that these items are peanut, tree nut, or egg free as manufacturing changes. The Safe Snack Guide is available on line and information is updated monthly. Please contact your school building's Health Office if you have any questions.
